## STATEMENT

I am a **New Media Designer** since 2005 with experience in five design agencies. Absolutely passionate for design, it's applications and how it works of course.

Beyond design concepts i also develop multimedia products such as web GUI, front-end and web/mobile UX/UI ( At the moment im developing my job based on "Agile UX" process, wich allows a small number of **deliverables** and a little fast paced working method).

I love to design functional, smooth and beautiful design concepts for all kind of media. I'm better developing UI/UX design concepts. It will be a pleasure to take any project to the next level.

## SKILLS

UI and UX

Web Design/Front-end

Motion Graphics

## NOT LESS IMPORTANT SKILLS

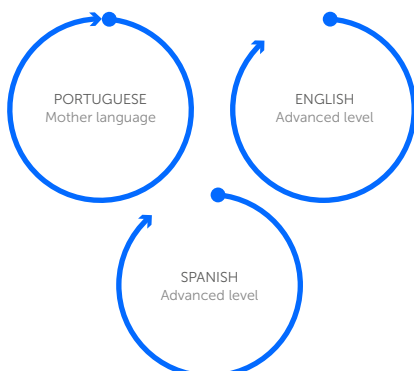

### Software

Sketch	○○○○○○○○○○○○○○
